Each year the children in grades 3-8 participate in standardized testing. Currently, Good Shepherd uses the **TerraNova Third Edition, Multiple Assessment Tests**. On this sheet you will find the test scores from the 2012-2013 school year. Objective Performance Index is an estimate of the number of items for a specific objective that a student could be expected to answer correctly if their had been 100 items in the objective. The numbers on this sheet are comparing Good Shepherd's 3rd - 8th graders to national and WELS Synod students.

For the school year 2012-2013 Good Shepherd students scored about 20 points higher than the national averages for this test.
